Open to freelance projects, internships and collaborations. Available for UI/UX design and full-stack web development work, from interface design and implementation to databases and deployment.

Profile

Third-year Computer Science engineering student at the **École Nationale Supérieure d'Informatique (ESI)** with **3 years of UI/UX design experience** and hands-on full-stack web development experience. I design user-centered interfaces and build web applications across frontend, backend, database integration and deployment. Comfortable collaborating with teams and turning product ideas into practical digital experiences.

Experience

- UI/UX Lead – ETIC Club2026 – 2027 Season
ESI Algiers
- UI/UX Designer – Internship, Temacina2025
B2B Marketplace Platform • temacina.com
- UI/UX Designer – Freelance2024 – Present

Selected Projects

- ETIC Design System Figma Plugin
Developing a Figma plugin that brings ETIC Club's visual identity (VI) and design system components into designers' workflows.
- ESI Code Hub
A GitHub-inspired platform for ESI students and instructors to submit, browse and collaborate on code. UI/UX design and frontend contributions using Next.js.
- ESI+
Collaborative platform for ESI students to share posts, resources and academic content; designed information architecture, user flows and interactive prototypes.
- Tassyir
School management platform for organizing students, teachers and administrative workflows. UI/UX design and frontend development.
